The Why

In response to critical gaps in Wyoming's health and human service network, Wyoming 211 has developed Wyoming CommuniCare, derived from a 5-10 year plan to create an innovative solution to streamline access to essential services across the state. Through the CommuniCare system and state-wide partnerships, we're amplifying healthcare access for a stronger, healthier Wyoming.

Our Tools to Enhance Health Outcomes

Resource Directory

Partnered with Wyoming 211, Wyoming CommuniCare delivers the most comprehensive and up-to-date resource directory in the state allowing for indirect and direct partner referrals.

Case Management

Our innovative case management technology enhances access to healthcare and social services with our integrated care coordination approach and efficient care team tools.

Reporting & Analytics

Our robust, customizable analytics reporting delivers actionable insights on community health trends, empowering data-driven decisions to improve population wellness outcomes.

From Struggle to Success

Tyson, a Cheyenne resident living in a motel without phone service, faced deteriorating mental health and couldn't refill his prescription. His friends contacted a Navigator who used the CommuniCare system to find services and send a direct referral to a nearby mental health center. Tyson quickly completed an intake, began regular counseling, and got his prescription filled at reduced cost. His friends were relieved to see him receiving coordinated support, and Tyson received the help he needed.
